

Custom Security Features

TITO Tickets & POS Rolls

TITO Tickets

Black Light Blue Ink

Transparent Ink

- Glows under an ultraviolet (black) light
- Can be seen without the use of a black light
- Can not be photocopied or digitally recreated

Black Light Yellow Ink

Transparent Ink

- Glows under an ultraviolet (black) light
- Can be seen without the use of a black light
- Can not be photocopied or digitally recreated

White-On-White Ink

White ink printed on white paper

- Replicates the look and security of a subtle elegant watermark
- Visible to the naked eye
- Can not be replicated on a copy machine

Thermochromic Ink

Pastel like inks activated by a temperature change

- When rubbed, this heat-activated ink will change to a colorless state or to another color
- When surface temperature returns to normal this ink will revert back to its original color
- Quick method to authenticate a genuine document from a counterfeit without any special device
- Can not be photocopied or digitally recreated

Fluorescent Ink

Bright neon-like inks

- Unique while adding a fun element to your custom product design

Unique and Sequential Numbering

Black numbering

- Unique authentication to keep track of individual product

POS Rolls

Coin Reactive Ink

Opaque white ink

- Converts to black when rubbed with an edge of a coin or a metal object
- Instant authentication, specially designed for POS rolls
- Nearly impossible to recreate
- Can not be photocopied or digitally recreated

POS Roll Perforations

Custom perforations to suit your specific design or application

- Only visible when viewed under an ultraviolet (black) light
- Can not be duplicated without a custom perforation blade or a special press
